c). Read the passage.

What do three hearts, eight arms, and one huge brain add up to? An octopus, a creature that can do amazing things. Octopuses are extremely intelligent. They can learn new things just like humans. They've even learned a few tricks to get them out of sticky situations. If an octopus is threatened by a predator, such as a shark or bird, it can use some pretty incredible skills to get away. Octopus doesn't have teeth or sharp claws to defend themselves. Instead, they use more clever ways to fool their attackers. Octopus likes to hide themselves in the sand on the bottom of the ocean floor. Well, the octopus is like a chameleon because it can change the colour of its skin to match the sand and this colour change, or camouflage, happens in less than a minute. Octopuses are invertebrates, meaning they don't have backbones. Another way an octopus can hide is by shooting ink. The ink forms a cloud that hides the octopus. By the time the ink clears and the predator can see again, the octopus swum away or hidden. It's very much like a magician doing a vanishing act.
