Pre-Mid Term Examination- 2018-19

CLASS-VI

TIME: 1:30 HRS

ENGLISH

MM – 40

Section- A READING

10 Marks

1. Read the given passage carefully and answer the questions that follow:

1. Read the passage given below and answer the questions that follow:

Pollution is the fouling of environment- land, water and air- by waste, smoke, chemicals and other harmful substances. The most serious pollution problems arise where there are large cities and many factories. Every country faces the problems of waste. As factories produce new goods for people to buy, old ones are usually thrown out along with house hold rubbish. Burning this waste pollutes the air and dumping it in rivers and seas pollutes water. Also rubbish piles look unpleasant and take up space. Getting rid of plastics is particularly difficult. Wood and paper decay after some time through the action of bacteria but plastics never decay. The more we throw away, the more litter is produced.

Choose the correct option to complete each sentence.

1x5=5

1. Pollution is theof the environment.

a. conservation b. fouling c. purifying d. saving

2. The most serious problems of pollution arise in.....
